Subject Index - Volume 42

Ageing, 525
3-Amino cardenolides, 171,189
Androgen, 137, 653
Androstenedione metabolism, early-lactation human milk cells, in, 389
Anencephaly, 677
Antifertility agents, stereoisomers of (+) 2, 6-diethyl-7α-ethynyl-3-(p-hydroxyphenyl)-trans-bicyclo (4.3.0) nonan-7β-ol as, 627
Aromatization, 77
Aromatization, early-lactation human milk cells, in, 389
Assay, competitive protein binding for corticosterone, 153
Azasteroids, effect on sterol reductase and isomerase, 311

Bile acid analysis, 575
Bile acid oxazoline, 105
Bile alcohols, 441
Borohydride reduction at C-20, 619
17 butyrloxy-11β, 21-dihydroxy-4-pregnene-3, 20-dione, 23

Cardenolide analogs, 37
Cardiac glycosides, 37
Castration, 63
Catechol estrogen, 163
Catechol estrogens, effect on hypertension, 603
Cerelirotendinous xanthomatosis, 441
Characterization of 10β-hydroperoxide, 401
Chemiluminescence immunoassay of estriol, 123
3-Chloro-pregnenes and glucocorticoid receptors, 409
Cholic acid transport, 205
Common transport carrier, 205
Corticosterone, 249
Corticosterone (pregnen-11β, 21-diol-3, 20-dione), assay for, 153
Cortisol metabolism. 511
Cultures and intestinal anaerobic bacteria, 105

Dehydroepiandrosterone sulfate, 653
Derivatives by hepatocyte monolayer, 105
Diethylstilbestrol, metabolism of, 353
Digitoxigenin derivatives, 171, 189
Digitoxigenin (3B, 14-dihydroxy-5B, 14B-card-20-(22)-enolide) analogs,37
3α,7α-Dihydroxy-5β-androstan-17-one, synthesis of, 707
1,25-Dihydroxyvitamin D antisera, 503
(23R, 24R)-23, 24-dimethyl-19-nor-5α-cholestan-3β-ol, 331
20α, 21 Diol and 17, 20α, 21 triol synthesis, 619
6, 17-Dioxo-1-3-5-(10)-estratrien-3-yl acetate, 469

Effect of adrenal and gonadal steroids on aldosterone metabolism, 283
Effect of antimineralocorticoids on aldosterone metabolism, 283
Enzymes, ovarian, 565
6α,7α-Epoxyandrost-4-ene-3, 17-dione, synthesis of, 707
Equilibrium separation method, in competitve protein binding assay for corticosterone, 153

Estriol-6-carboxymethyloxime-ABEI, synthesis of, 123
Estrogens, 669
Estrogen 2-Hydroxylase, 93
Estrogen, Stimulation of uterine polyamine biosynthetic decarboxylases, 609
Estrone, 17-B-hydroxyamino derivatives, 1
Estrone, 17-B-isopropylidene-amino-N-oxy,1
Estrone, nitrones from 17-B-hydroxylamino-derivatives, 1
Ethanol, 457

Fetal adrenal, 653, 677
Fetal kidney, 299
Fetal steroid catabolism, 511

Glucocorticoid receptors and 3-chloro-pregnanes, 409
Glucosiduronidation of 3α-hydroxy-5α-androstan-17-one by human breast tumors, in relation to progesterone receptor content, 449
Glucuronidation of metabolites of corticosterone and deoxycorticosterone, 349
Gonadotropin release inhibition by 9β-estrogens, 555
Granulosa cells, 565
Guinea-pig, 137
Guinea-pig fetus, 511

Halistanol sulfate, isolation from sponge Halichondria sp., 267
Haloestrogens, 93
Hepatocyte monolayer culture, 105
Hepatocytes in primary culture, 205
Heterogeneity of antiserum binding sites, 475
High-performance liquid chromatography of estrogen conjugate, 163
Human uterus, 687
3α-Hydroxy-5α-androstan-17-one glucosiduronidation, by human breast tumors, 449
16α-Hydroxylase, 55
17-Hydroxylase, 299
17β-Hydroxy-17α-methyl-4-androsten-3-one, 115
17β-Hydroxysteroid Dehydrogenase, 525
(3) 3β-Hydroxysteroid dehydrogenase inhibition, 457
1α-Hydroxy-25, 26, 27-trisnorcholecalciferol-24-oic acid, 503
Hypertension, effect of catechol estrogens, 603

Identification of 5β-cholestane-3α,7α,12α,25, 26-pentol, 441
Inhibition, 93
Intestinal bacteria, 105
Isolation of 10β-hydroperoxide, 401
24-Isopropyl-5-cholesten-3β-ol and 24-isopropyl-5, 22E-cholestadien-3β-ol, isolation from sponge, 267

Lipoidal estradiol, binding to estrogen receptors, 417
Lipoidal estradiol, significance in mammary tumors, 417

Mammary tumors, lipoidal estradiol in, 417
Mass spectra, of steroid glucosiduronates, 349
Medroxy progesterone acetate, effect of, on monoamino oxidase and brain dopamine levels, 231

Metabolism, 365
Metabolism of bile acid oxazoline, 105
Metabolism of ^{3}H-Estradiol-β by cultures of isolated rat sertoli cells and the effect of FSH: presence of 16α-hydroxylase, 55
Metabolism of estradiol 17-glucuronide, 163
Metabolism, of synthetic androstanes,115
(22E, 24S)-24-methyl-19, 27-bisnor-5α-cholest-22-en-3β-ol,331
(22R, 23R)-22, 23-methylene-19-nor-5α-cholestan-3β-ol, 331
17α-Methylnorethindrone enanthate 10β-hydroperoxide, 401
4α-Methylsterols, in nematodes, 311
Myometrial cell cultures, 525

NADH, 77
Natural products, marine sterol, 217
Nematodes, 4α-methylsterols in, 311
New marine steroid, isolation from sponge of the family Halichondriidae, 267
Non-estrogenic metabolites of DES , 353
19-norstanols, 331
NMR spectroscopy, sterol C-24 epimers, 217
^{13}C NMR spectra of 17α-methylandrostanes
Osteoporosis, 669
Ovarian steroidogenesis, 641
6-Oxo-1,3,5(10)-estratrien-3, 17β-yl diacetate, 469
6-Oxo-1,3,5(10)-estratrien-3, 16α, 17β-yl triacetate, 469

Parathyrin, 147
Δ^5 and Δ^4 pathways, 641
Placenta, 77
Polyamine biosynthetic decarboxylases, estrogen stimulation of uterine,609
Positive inotropic agents, 171, 189
Pregnancy, 137
Progesterone, radioimmunoassay in saliva of, 539
Progestins, 669
Progestin receptors, 687
(24ξ)-24-propyl-19-nor-5α-cholestan-3β-ol, 331
Prostaglandin synthase mediated metabolism (of DES), 353

Radioimmunoassay,23
Radioimmunoassay of 1,25-dihydroxyvitamin D, 503
Rapid pulses, 249
Rate constants and affinity constants, 475
Rat liver microsomes, 163
Rats, 249
Receptors, 427
Regulation of aldosterone metabolism, 283

Saliva, progesterone radioimmunoassay in, 539
Secosteroids, stereoisomers of (+)2,6-diethyl-7α-ethynyl-3-(p-hydroxyphenyl)-trans-bicyclo (4.3.0)nonan-7β-ol, synthesis of, 627
Sedimentation behavior, 687
Sertoli cells, 55
Serum bile acid, 575
Side chain alkylation, new pattern of, 267
β-Sitosterol (plant sterols), 635
Sitosterolemia and xanthomatosis, 635
Sokotrasterol sulfate, isolated of, 267
Sonication, the importance of, in salivary progesterone RIA, 539
Spirolactones, 365
Sponge sterols, 331
Stereoselective reduction at C-20, 619
C_{21} Steroids, 299
Steroid glucosiduronates, synthesis and mass spectra, 349
Steroid keto aldehyde oxidation, 549
Steroidogenesis, enzymes, 565
Steroid oxidation with silver oxide, 549
Sterols, marine 4-methyl, 217
Structure-activity relationships of 9β-estrogens, 555
Sulfation of bile acid, 575
Synthesis of 8,13-diaza-3-thia analogue of gona-17-one, 493
Synthesis of (±)-8,13-diaza-3-thia-anorgona-1,5(10)-dien-17-one,493
Synthesis of [3α-^{3}H] - sitosterol, 635
Synthesis of steroid 20-oxo-21-oic acids, 549

Testis, 365, 457
Testosterone, 63
Testosterone - antiserum interaction, 475
Testosterone-proportionate, 63
24,25,26,26-Tetramethyl-5α-cholest-23E-ene-2β, 3α-6α-triol trisodium trisulfate, isolation, 267
Total synthesis of heterocyclic steroids, part VII, 493

Uterine polyamine biosynthetic decarboxylases, estrogen stimulation of, 609
Uterotropic activity of 9β-estrogens, 555

Vitamin D metabolites, 147
In vitro, 147
